Summary

I am an experienced machine learning scientist with a product-focused mindset. I have contributed to several multi-disciplinary projects funded by NSF, NASA and DARPA with a proven track record in the Environmental AI domain (27 peer-reviewed publications and 7 patents). As a proactive and self-motivated professional, I have successfully led ML projects from research to product delivery, driven by customer needs. I value mentorship, and aspire to lead cross-functional teams to deliver real-world impact. Please visit my website to learn more.

Interests: Computer Vision, Natural Language Processing, Spatio-Temporal Analysis, Product Strategy

Education

University of Minnesota   Minneapolis, USA | 09/2012 - 05/2019
Ph.D. in Computer Science

International Institute of Information Technology-Hyderabad   Hyderabad, India | 07/2006 - 03/2012
B.Tech + MS by Research in Computer Science and Engineering

Experience

Terra Cover | Co-Founder and CTO   Denver, USA | 01/2020 - Present

- Successfully secured a $255K NSF SBIR grant (≈15 % success rate), and established product-market fit for two core products through deep customer engagements, resulting in multiple paid pilot projects.
- Led the development of ML algorithms (semantic segmentation, anomaly detection, and variational inference) and streamlined the development cycle from data collection to product delivery on Google Cloud Platform.
- Implemented an LLM-based pipeline using OpenAI's API to reduce human annotation time by 70% for geo-tagging 20,000 image captions from 9,000 news articles, resulting in a comprehensive catalog of past flood events.

University of Minnesota | Researcher   Minneapolis, USA | 05/2019 - Present

- Developing a new label-efficient semantic segmentation network to create the first high-resolution map of Arctic lakes for reducing the uncertainty in the estimation of methane emissions from small lakes.
- Developing a new pre-training strategy for building a large-scale foundation model for temporal sequences of satellite imagery sampled from across the world.
- Created the first global dataset containing surface water history of over 0.5 million water bodies (published as an open-source dataset in Nature Scientific Data) to facilitate studies on the impact of climate on water resources.
- Mentored 3 graduate students and co-authored several peer reviewed publications on topics such as advancing RNNs and Transformer based approaches for modeling timeseries data for hydrology.

IBM T.J. Watson Research Center | Research Intern   Yorktown Heights, USA | 06/2016 - 08/2016

- Contributed to a publication on anomaly detection from multivariate noisy sensor data.
- Implemented key anomaly detection algorithms for IBM's anomaly detection software.

NASA Ames Research Center | Research Intern   Mountain View, USA | 06/2015 - 08/2015

- Set up the project to study the dependencies of forest ecosystems on climate variables.
- Implemented different regression algorithms on NASA's distributed computing environment.

University of Minnesota | Graduate Research Assistant   Minneapolis, USA | 09/2012 - 05/2019

- Actively engaged in interdisciplinary discussions to help launch multiple projects aimed at advancing AI for tracking land cover changes such as palm oil plantations, surface water changes, and crop detection.
- Doctoral Dissertation Fellowship winner for research on mapping global water changes with machine learning.
- Lead writer of a $1.43 million NSF grant on advancing deep learning to monitor global land cover change.

Patents

- **Khandelwal, A.**, Karpatne, A. and Kumar, V., University of Minnesota, 2023. *Satellite image classification across multiple resolutions and time using ordering constraint among instances.* U.S. Patent 11,625,913.
- Kumar, V., Jia, X., **Khandelwal, A.**. and Karpatne, A., University of Minnesota, 2021. *Predicting land covers from satellite images using temporal and spatial contexts.* U.S. Patent 11,068,737.
- Kumar, V., Jia, X., **Khandelwal, A.**. and Karpatne, A., University of Minnesota, 2021. *Discovery of shifting patterns in sequence classification.* U.S. Patent 11,037,022.
- Kumar, V., Mithal, V., Nayak, G. and **Khandelwal, A.**, University of Minnesota, 2020. *Classification of highly-skewed data.* U.S. Patent 10,776,713.
- Boriah, S., Kumar, V., Mithal, V. and **Khandelwal, A.**, University of Minnesota, 2016. *Unsupervised spatio-temporal data mining framework for burned area mapping.* U.S. Patent 9,478,038.
- Boriah, S., Kumar, V., **Khandelwal, A.** and Chen, X.C., University of Minnesota, 2016. *Unsupervised framework to monitor lake dynamics.* U.S. Patent 9,430,839.
- Boriah, S., **Khandelwal, A.**, Kumar, V., Mithal, V. and Steinhaeuser, K., University of Minnesota, 2015. *Automated mapping of land cover using sequences of aerial imagery.* U.S. Patent 8,958,603.

Synergistic Activities

NSF I-Corps Customer Discovery Bootcamp | Entrepreneurial Lead   Detroit, USA | 09/2018 - 10/2018
- Conducted 100 interviews with stakeholders in commodity trading, and hydro-power generation segments.
- Used lean startup methodologies to assess problem-solution fit for satellite imagery processing technology.

Grant Writing
- *SBIR Phase I: A Physics Guided Machine Learning Framework for Monitoring Rivers using Satellite Imagery.* NSF Small Business Innovation Research Program, $255,000, Jul 2021 - Dec 2022. **(Principal Investigator)** NSF Grant #2045444.
- *BIGDATA: Advancing Deep Learning to Monitor Global Change*. NSF Translational Impacts Program, $1.43 million, Nov 2018 - Jul 2023. **(Lead Writer)** NSF Grant #1838159.
